Physics Education

Published by the American Association of Physics Teachers

The American Association of Physics Teachers is a national organization of physics educators. It was founded in 1907 as the American Association of University Teachers of Physics and has since grown to include teachers at all levels of education. The association's primary purpose is to advance the teaching of physics and to improve the quality of physics education. It does this through a variety of activities, including the publication of journals, the holding of conferences, and the provision of resources for teachers. The association also works to promote the importance of physics in society and to encourage students to study the subject.

Contents of volume 15

January 1980

- January leader: BER hunting: SHEILA SAVILLE 1
Laser-driven fusion: A F GIBSON 4
Piezoelectric devices in electronics: M REDWOOD 9
An introduction to Prestel: BRYAN DEW 15
Physics in plastics technology: KEN THOMAS 21
The variety of fluid dynamics: FRANCIS BARNES,
DAVID FORD, RALPH JORDINSON AND NORMAN
MACLEOD 24
Physics on stamps: Appendix X: E J BURGE 30
Computer solution of the Schrödinger equation—two
useful programs: D E EVANS 32
Physics in the polytechnics: A J POINTON 37
Physics projects in sixth-year studies in Scotland: H M
MACLAREN 44
U.h.f. power transistors and Lecher line oscillators: R
W HOWES 49
Matrix methods in introductory physics: R J
OSBORNE 51
A web of naked fancies? BRIAN DAVIES 57
News and comment 1, Letters 3, Queries in
physics 14, Have you read this? 42, Book
reviews 61, Forthcoming conferences and
courses 64

March 1980

- March leader: It's not like that: A W TROTTER 65
Recent advances in infrared astronomy: E I
ROBSON 68
Operational amplifiers—some misconceptions: M K
SUMMERS 73
Rapid statistical methods: part 1: A J LYON 78
Localised and nonlocalised interference fringes: D A
RICHARDS 84

- A digital timer with memory and its application to
dynamics experiments: A M MACLEOD AND W R
HOGG 87
Misconceptions in physics amongst South African
students: H HELM 92
Notes on experiments 98
An approach to Hooke's law: J MWANJE 104
A versatile nodal slide: M A S SWEET AND G K
STILL 106
Liquid crystals: J E BALL 108
Stationary waves: R BROWNING 110
Undercurrents: DOUGLAS P NEWTON 112
Einstein and Brownian motion—a student project: J
LEP WEBB 116
Construction of a dynamic load line: MORDEHAI
HEIBLUM 122
News and comment 65, Letters 67, Queries in
physics 77, Have you read this? 90, Film
reviews 124, Book reviews 125, Forthcoming
conferences and courses 128

April 1980

- Physics courses supplement
Introduction 1
Courses in physics in England, Wales and Northern
Ireland 3
Courses in physics in Scotland 55
Courses index 61
Institution index 62

May 1980

- May leader: The physics curriculum—a suitable case
for treatment? LEWIS ELTON 129
Recruiting physics teachers—12 years after Swann: J J
WELLINGTON 134

Supply of physics teachers—into the 1980s: B R CHAPMAN 136
 Recent developments in x-ray astronomy: A P WILLMORE 145
 Notes on experiments 150
 The SISCON-in-schools project: J SOLOMON 155
 Meteorology film review 159
 Physics in cement and concrete technology: C D POMEROY 171
 Metallurgy and physics: W E DUCKWORTH AND R H LEWIN 176
 A simple Raman spectrometer: J P BLOND AND D M BOGGETT 181
 Ausubelian psychology—help for learning difficulties: ROBERT L MILLER 186
 Foundation physics at Liverpool Polytechnic: A R ROBERTS 191
 News and comment 129, Letters 132, Physics apparatus 143, Have you read this? 185, Book reviews 194, Queries in physics, forthcoming conferences and courses 200

July 1980

July leader: Physics, Finniston and industrial innovation: D H ROBERTS 201
 Editorial: Is it what you want? ROY SCHOFIELD 203
 Recent developments in optical astronomy: F G WATSON 206
 Particles, quarks, leptons and coloured glue: LEWIS RYDER 211
 A national problem: DAVID HOOPER 217
 The Project Scotia competition: H I ELLINGTON, E ADDINALL AND M C HATELY 220
 The physics of television broadcasting: H I ELLINGTON, E ADDINALL AND M C HATELY 222
 Spatial ability, sexism and society: ROBIN HOWES 229
 A working model of incompatible quantum variables: J C MATTHEWS AND F W SHEARD 231
 A school experiment to confirm Abbe's theory: BAZYLI BOŃCZAK AND JAN DABROSKI 235
 Ohm's law and the definition of resistance: COLM T O'SULLIVAN 237
 Notes on experiments 240
 To make a vain man humble: BRIAN DAVIES 248
 Jeans' role in the law of black-body radiation: J B T MCCAUGHAN 255
 News and comment 201, Letters 205, Queries in physics 234, Have you read this? 246, Film reviews 260, Book reviews 261, Forthcoming conferences and courses 264

September 1980

Editorial: What are we going to do about microelectronics? R DOUGLAS MASTERTON 265

Editorial: Has physics had its chips? R W FAIRBROTHER 266
 Recent developments in radioastronomy—part 1: R S BOOTH 270
 The physics of swimming: M R KENT 275
 Rapid statistical methods: part 2a—error estimates A J LYON 280
 Nuclear power and the science curriculum: WILLIAM SCOTT 286
 Laser communication—an ideal student project: W P LEUNG, K H HO AND M B NG 288
 Fraunhofer alphabet ALAN WINTER 291
 Notes on experiments 292
 The 'ionising radiation' project: TH HEIJ AND H P HOOYMAYERS 295
 Demonstrations of Lissajous' figures and Fourier synthesis: A M MACLEOD 298
 Examinations for an integrated science degree programme: G D MOSS 302
 A tilted plane as a gravitational field model: D P HALE 306
 Wollaston's cryophorus—precursor of the heat pipe: B A SMITH 310
 The ambiguous neutron: JOAN L HAWES 315
 The vibrations of hand bells: S D KELBY AND R P MIDDLETON 320
 News and comment 267, Letters 268, Have you read this? 285, Physics in the media 297, Queries in physics 309, Book reviews 323, Forthcoming conferences and courses 328

November 1980

November leader: It needs to be said: JOHN ZIMAN 329
 The geophysical revolution in geology: PETER J SMITH 334
 Radiometric dating in geology: R J PANKHURST 340
 Physics in oceanography: H CHARNOCK 344
 The earth's gravity and its geological significance: A H COOK 350
 Recent developments in radioastronomy—part 2: R S BOOTH 354
 Writing about physics: P E RICHMOND 361
 TEC physics: NORMAN J RICHES 364
 Physics in police investigations: PETER YOUNG 368
 A wave is a wave is a wave . . . so where is the difficulty? R H DEAN 373
 A technique for exploring students' views of the world: ROGER J OSBORNE AND JOHN K GILBERT 376
 Following Wilson into the clouds: L W BROWN 380
 An apparatus for the determination of Curie temperature: P A BATES AND A M KENT 386
 News and comment 329, Letters 332, Queries in physics 343, Have you read this? 375, Book reviews 389, Forthcoming conferences and courses 392
